# Aqeri

# 37000

Aqeri 37000 is available with wireless Internet based on EDGE technology, which makes the datacommunication extremely effective. The EDGE technology is a further development of GPRS, it offers a download capacity of up to 247 KB/s and a upload capacity of 123 KB/s. Standard GPRS normally has a download and upload capacity of 56KB/s.

A standard antenna is included in the GPRS/EDGE option. There are also other antennas available, for example for outdoors use.
