

VARSA

- 10-18V DC or 90-305V AC Input
- Draws .6 amps @120V, .3 amps @ 240V
- Power factor corrected
- Instant on
- Available in daylight or tungsten
- Color accurate from fixture to fixture
- Stable color through entire dim range
- Flicker-free up to 1500 FPS (full dim range)
- Flicker-free at any speed (at 100%)
- Emits no UV or IR
- Long-life LEDs (20,000+ hours)
- Built-in Chimera mount
- DMX controllable
- Two year limited warranty
- ETL & CE compliant

The newest fixture in the Nila line, the Varsa gives you a lot of punch in a small package. It's also the first light in the Nila line that can accept DC voltage directly. That's right, no more inverters. Just connect your own 10V-18V battery and you're ready to go. We even offer yoke-mountable plates for popular gold mount and V-mount camera batteries. The perfect solution just got better!

"Nila lighting really has provided us with the ability to add that additional punch without the additional power draw. I couldn't be more happy."

Craig Yanagi,
