

## Cleaner UV-C

Disinfect your assets in **30 seconds** and ensure a safer and healthier workplace.

The Cleaner UV-C is a robust UV-C cabinet specially developed for use within companies. The operation is simple, safe, simple and without medical background for everyone to use. A fully controlled process for disinfecting your assets.

- Simple, safe and fast
- Can be used for keys, telephones, handheld terminals, headsets, tablets, etc.
- Proven UV-C method as also used in hospitals and food industry

### Simple

Disinfection couldn't be easier. Disinfect your mobile equipment, keys and other assets 360° in 30 seconds, with one push button.

### Safe

The Cleaner UV-C has several security levels built in, such as a safety relay or the hermetic (light-tight) double door, equipped with an electronic lock, which opens automatically after the disinfection process.

### Fast

UV-C light kills very quickly (30 seconds) and effectively viruses and bacteria. Due to the special reflection in the Cleaner UV-C, equipment is disinfected 360°.

### Efficient

The same proven method is also used in hospitals and the food industry to deactivate microbes.

## How does it work?

Remove visible dirt from your device, such as dust and grease.

Place your device on the stainless steel grid in the CapCleaner UV-C

Disinfect your hands during the process, according to your protocol.

After 30 seconds, the door opens automatically and you can take your equipment.

A complete manual and a working procedure are supplied with the Cleaner UV-C
