Available Options

Increased Output Power

The conservatively rated unit allows to deliver extra output with the same reliability. At some derating, either the maximum

output voltage or the maximum output current can be increased by about 10%.

- Order Code - P069

High Voltage Isolation

A higher output isolation allows series operation up to 1000V.

- Order Code - P089

Secured Voltage and Current Setting

For a maximum security, the CV/CC settings can be adjusted with a

screwdriver only and are protected with a plastic cap from accidental adjusting.

- Order Code - P001

Sequencer

Arbitrary Waveform generator or standalone automation. The sequencer is integrated in the Ethernet controller.

- Order Code - P150

Rear Power Output and Remote Sensing

Output terminals at the rear panel instead of bind posts at the front panel, includes

remote sensing.

- Order Code - P119 - 122
